

Hello! I am writing in regards to a new issue about LPFM stations. I currently listen to K-Love in Chicago on 94.3 and K-Love is a national radio station which uses FM translators. K-Love has a tremendous impact on me as an individual and is about the only FM station I listen to in the area. K-Love also has a positive impact on the Chicagoland community by giving mutual encouragement and good family-focused music. I believe this service provided by K-Love is in the public interest because of the benefits it provides. There are very few Chicago radio stations that provide Christian and family music - and removing K-Love would not only limit choice, but would also cease to improve the community. Thank you.
